DETAILED ACTION

Claim Objections

The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 9 and 10 have been renumbered as claims 8 and 9.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-8 are again rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-4 of U.S.

Patent No. 6,666,861 to Grabek. Although the conflicting claims are not identical, they

are not patentably distinct from each other because they are directed to analogous methods for an anatomic feature of the left atrium of the human heart.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 9 is again rejected under 35 U.S.C. 102(b) as being anticipated by Mirarchi et al. U.S. Patent No. 5,562,619.

Mirarchi et al. disclose an electro-surgery device for cutting tissue comprising:
an elongate tubular body; a fixed handle attached to said tubular body; a sliding handle adapted to slide along said tubular body and located proximate said fixed handle; a snare having a first end connected to said tubular body and a second end attached to said movable handle as presently claimed.

In response to the applicant's argument in page 5 of the response filed on June 8, 2005, the word "snare" is considered in the Office Action as a surgical instrument consisting usually of a wire loop constricted by a mechanism in the handle. It could also be broadly interpreted as a noose for entangling, or of string or metal spirals. Therefore, Figures 20-21 of '917 clearly shows snare 90; and Figures 25, and 31 also show snares of different configuration. Hence, U.S. Patent '917 to Fleischman et al. anticipates the claimed device.

Allowable Subject Matter

Claims 1-8 would be allowable if overcome the obviousness-type double patenting as over claims 1-4 of U.S. Patent No. 6,666,861 to Grabek. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome this double patenting rejection.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
